DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12 February 2008 has been entered.

2. Claims 1-14 have been presented for examination. Claims 15-21 have been cancelled.

Response to Arguments

3. Applicant's arguments with respect to claims 1-14 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 7 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Regarding claim 7, the term "feasibility" and the limitation as a whole are indefinite. What does "feasibility" mean in the context of the claim? How is it calculated? Regarding claim 14, the term "partially optimized" and the limitation as a whole are indefinite. What does "partially optimized" mean within the context of the claim? What parameters are optimized? How is the optimization performed?

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Application/Control Number: 10/786,965 Page 3

Art Unit: 2128

5. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Friedrich (US Patent

No. 5,276,877).

Regarding claims 1 and 8:

Friedrich discloses a method of enabling a user to construct on a target data storage system to replace a

source data storage system through consolidation of one or more data storage components of the source data storage

system (abstract), the method comprising the steps of:

a. displaying a user interface to the user (column 9 line 53-column 10 lines 19), the user

interface including a selector to enable the user to select a data storage component for

inclusion in the target data storage system (column 13 lines 28-35)

b. merging the data storage component into the target data storage system including obtaining

configuration characteristics and workload characteristics for the data storage component

(column 14 lines 36-50)

c. simulating performance of the target data storage system using one or more workloads to

obtain utilization and performance information for each data storage component and for the

target data storage system (See Fig. 3(a) and 3(b); column 10 lines 8-20, 43-49; column 14

lines 66-column 15 line 2; column 32 line 43-column 33 line 14)

e. graphically representing the utilization or performance of teach of data storage components in

the target storage system on the user interface to enable the user to visually determine whether

the target data storage system meets a desired performance (column 15 lines 3-30)

Friedrich discloses a computer (column 2 lines 61-67).

Regarding claims 2 and 9:

Friedrich discloses obtaining the workload characteristics from a workload analyzer that analyzes the

workload characteristics of the associated data storage component when executing in the source storage system in

response to the one or more workloads (column 14 lines 46-65).

Application/Control Number: 10/786,965

Art Unit: 2128

Regarding claims 3 and 10:

Friedrich discloses inputting the workload characteristics by a user (column 10 lines 21-33).

Page 4

Regarding claims 4 and 11:

Friedrich discloses consolidating the source data storage system by constructing the target data storage

system to include fewer data strorage components that the source data storage system (column 14 lines 21-34).

Regarding claims 5 and 12:

Friedrich discloses data storage components in the target system that are of higher capacity than the source

system (column 26 line 53-column 27 line 21).

Regarding claims 6 and 13:

Friedrich discloses load balancing the system in accordance with simulation results (column 11 lines 25-

36).

Regarding claim 7:

Friedrich discloses indicating the feasibility of consolidating a plurality of data storage components of the

source system to fewer or newer storage components (column 29 lines 48-59 displays devices that may be

removed).

Regarding claim 14:

Friedrich discloses partially optimizing the system in accordance with the simulation results (column 1

line 5-clumn 2 lines 49: analysis done to improve system).

Conclusion

Examiner's Remarks: Examiner has cited particular columns and line numbers in the references applied

to the claims above for the convenience of the applicant. Although the specified citations are representative of the

teachings of the art and are applied to specific limitations within the individual claim, other passages and figures

may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the

references in their entirety as potentially teaching all or part of the claimed invention, as well as the context of the

passage as taught by the prior art or disclosed by the Examiner. In the case of amending the claimed invention,

Applicant is respectfully requested to indicate the portion(s) of the specification which dictate(s) the structure relied

on for proper interpretation and also to verify and ascertain the metes and bounds of the claimed invention.

7. Any inquiry concerning this communication or earlier communications from the examiner should be

directed to Shambhavi Patel whose telephone number is (571) 272-5877. The examiner can normally be reached on

Monday-Friday, 8:00 am – 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kamini Shah

can be reached on (571) 272-2279. The fax phone number for the organization where this application or proceeding

is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information

Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR

or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more

information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the

Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
